

Workflow solutions for released N-glycan profiling

A comprehensive set of integrated products for fast, efficient, and accurate N-glycan analysis

REAGENTS

**GlycoWorks *Rapi*Fluor-MS™
Sample Preparation Kits**

Streamline workflow to three steps, and complete it in under one hour

CONNECTED LAB

OneLab and Online Protocol Library

Intuitively design and execute sample preparation protocols

ROBOTICS

Andrew+ Benchtop Pipetting Robot

Improve productivity and minimize variability for complex and routine sample preparation

DETECTION

ACQUITY™ UPLC™ System with Mass Detection or SmartMS-enabled BioAccord™ System

Generate high quality data for routine and high resolution analysis

SERVICES

Analytical Professional Services

Achieve desired application outcomes with full traceability anywhere in the world
