

Accelerate Productivity, Improve Outcomes

Agilent CrossLab method
and application services

Now you don't have to waste time and resources on method development, optimization, and troubleshooting

Partner with Agilent CrossLab to overcome application problems and reduce the time it takes to deploy the latest productivity and usability enhancements. Our global team of scientific and technical experts harness their deep knowledge of Agilent equipment and laboratory best practices to address your application needs.

Agilent
CrossLab
From Insight to Outcome

Operators not familiar with hardware or software? Need troubleshooting help?

We can enhance your team's application knowledge and keep your method operational.

Transferring your method or adding new method capabilities?

Let us help you optimize your method, so you can get the results you need in the most efficient way possible.

Having trouble putting a method into practice?

We'll work with you to implement a referenceable method based on application notes, USP method, instrument demo, publication, kit, or analyzer.

Limited method development experience?

We can research and develop a custom method suited to your laboratory's needs.

Expert insights based on your lab's requirements

Method maintenance

When your lab is running a method day in and day out, you don't want surprises. We can help keep your methods running smoothly with services like these:

- New-hire application training
- Application troubleshooting
- Data analysis, automation, and reporting
- Tuning and calibration

Method implementation

Begin producing reliable results from the start. Let us help you quickly and accurately implement methods with services such as:

- Chromatographic choice
- Acquisition selection
- Database/library creation and macro development
- Compound identification/molecular structure elucidation
- Sample preparation assistance

Method optimization

Success depends on the timeliness and accuracy of your data. We'll work with you to find hidden method improvements that can take your results to the next level. Our services include:

- Sensitivity optimization
- Differential profiling/expression
- Method transfer
- Workflow optimization

Method development

Frustrated by tedious method development? Give us a call. We'll help simplify the process with these services and more:

- Methods for advanced, complex applications
- Long-term projects and in-depth collaborations
- Remote consulting by telephone or Webex

Your Agilent representative will work with you to create a customized package of services based on your lab's technologies and application needs.

Agilent CrossLab services. From insight to outcome.

CrossLab is an Agilent capability that integrates services and consumables to support workflow success and important outcomes like improved productivity and operational efficiency. Through CrossLab, Agilent strives to provide insight in every interaction to help you achieve your goals. CrossLab offers method optimization, flexible service plans, and training for all skill levels. We have many other products and services to help you manage your instruments and your lab for best performance.
