

# KnowItAll Supported File Formats

## Supports multiple file & instrument formats

With Wiley's KnowItAll software scientists can analyze and manage multiple types of spectral and chemical data in multiple file and instrument formats to support your workflow. *Formats supported depend on KnowItAll license/edition.*

### Below is a list of supported file filters and extensions

KnowItAll can also import XY data / spreadsheets: Generic X Y data files (\*.\*) ; text files delimited by comma, tab, etc. (\*.csv).
